

Please don't restrict my rights as an American, who ancestor was a signer of the Declaration of Independence, not to be able to choose where I get my radio information. This country was found on freedom and on capitalism. Just reject this threat. I live in an area where there is very limited radio sources and I enjoy getting a clear signal. I am looking forward to traveling this summer and being to get the weather and travel information where I don't have to search all over the dial. I have heard the local stations when I have traveled in the past. The signal quality was lousy.
